

# Stowaway Turbo Series Boat Air Conditioning

Powerful, Quiet & Compact With No Drain Pan Worries

The Stowaway Turbo series completely revolutionized self-contained boat air conditioning (cooling and heating) with patented innovations in marine air conditioning system design, winning the IBEX Innovation Award in 2007.

The rust-free molded composite drain pan has three drains for the rapid removal of condensate water. The drain pan has a small footprint for installation flexibility.

A vibration-isolation mounting system results in significantly quieter, virtually vibration-free performance. The enclosed blower motor eliminates overhang for reduced depth.

The Turbo series was specifically engineered to harness and maximize the impressive performance of R-410A, a proven and environmentally safe refrigerant gas.

The optional Turbo sound cover provides up to 50% further noise reduction. This compact, easy-to-install sound cover completely encases the compressor to provide a 3- to 5-dB reduction in noise. Available for all Turbo models, the sound cover installs in minutes. Mounting hardware is included.

Vibration-isolation mounting clips reduce vibration and noise.

Optional sound cover further reduces compressor noise by up to 50%.

## Key Benefits

- Up to 27% more energy efficient
- Up to 21% increased capacity
- Compact design uses less space
- Rust-free composite drain pan
- Up to 85% less standing water in the drain pan
- Vibration-isolation mounts reduce noise and vibration.
- Engineered to maximize the performance of R-410A, an environmentally safe refrigerant
- Designed from the inside out with multiple patented innovations
- Optional sound cover further reduces compressor noise by up to 50%.

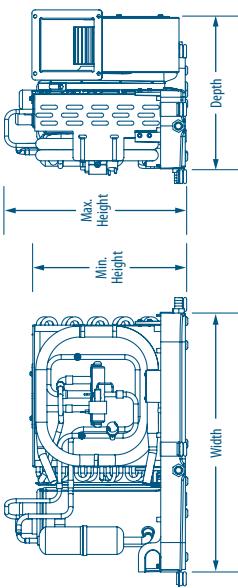

## Product Testimonial

"There is very little noise coming from the compressor, and vibrations are practically non-existent. I highly recommend this unit."

— Bob Silverman, boat owner

<sup>1</sup> Add 1°C for 230V/60Hz units or 1°C for 220-240V/50Hz units. For example: ST08=115V/60Hz; ST08C=230V/60Hz; STOCK=220-240V/50Hz

<sup>2</sup> BTU and electrical data are based on 45°F/7.2°C evaporator and 100°F/37.8°C condenser in cool mode, and 40°F/5°C evaporator and 130°F/54.4°C condenser in heat mode.

<sup>3</sup> 60Hz units must not operate at 50Hz and 50Hz units must not operate at 60Hz unless data plate states otherwise.
